AMENDMENT

IN THE CLAIMS:

Please amend the claims as follows:

- 1-4. Canceled.
- 5. (Previously presented) An isolated polynucleotide comprising the nucleic acid sequence of SEQ ID NO: 1.
- 6-8. Canceled.
- 9. (Previously presented) An isolated polynucleotide which encodes a polypeptide that comprises the amino acid sequence of SEQ ID NO: 2.
- 10-11. Canceled.
- 12. (Original) An Escherichia coli strain Top10/pXK99EdeaD deposited as DSM 14464.
- 13-33. Canceled.
- 34. (Previously presented) An isolated polynucleotide comprising nucleotides 259 to 2130 of SEQ ID NO: 1.
- 35. (Previously presented) An isolated polynucleotide consisting of SEQ ID NO: 1 or a fragment of SEQ ID NO: 1 that encodes a polypeptide having the enzymatic activity of a DNA/RNA helicase.
- 36. Canceled.

- 37. (Previously presented) An isolated polynucleotide comprising the bucleotide sequence of the complete complement of SEQ ID NO: 1.
- 38. (Currently amended) A vector comprising the isolated polynucleolide of any of the claims 5, 9, 34, 35 or 37.
- 39. Canceled.
- 40. (Previously presented) An isolated polynucleotide consisting of a DNA fragment of SEQ ID NO: 1, wherein said fragment consists of at least 30 consecutive nucleotides.
- 41. Canceled.
- 42. (Previously presented) An isolated polynucleotide consisting of a DNA fragment of the complete complement of SEQ ID NO: 1, wherein said fragment consists of at least 30 consecutive nucleotides.
- 43. (Currently amended) A vector comprising an isolated polynucleotide, wherein said isolated polynucleotide consists of the isolated which consists of the vector nucleic acid and the polynucleotide of claim 40 or 42.
- 44. (Previously presented) The vector of claim 43, wherein said vector is pXK99EdeaD deposited in Escherichia coli Top/pXK99EdeaD under DSM 14464.
- 45. Canceled.
- 46. (Currently amended) The primer of claim 45, wherein said DNA fragment consists of at least 40 consecutive nucleotides An isolated nucleic acid primer or probe consisting of a DNA fragment of SEQ ID NO: 1 or its complement, wherein said fragment consists of at least 30 consecutive nucleotides.

- 47. Canceled.
- 48. (Currently amended) The probe of claim 47, wherein said DNA freigment consists of at least 40 consecutive nucleotides. An isolated nucleic acid primer or probe consisting of a DNA fragment of SEQ ID NO: 1 or its complement, wherein said fragment consists of at least 40 consecutive nucleotides.
- 49-50. Canceled.
- 51. (Previously presented) A recombinant host cell of the genus Corynebacterium or of the species Escherichia coli comprising the vector of claim 43.
- 52. (Previously presented) The host cell of claim 51, wherein said host cell is of the species Corynebacterium glutamicum.
- 53. (Previously presented) A vector comprising an isolated polynucleotide, wherein said isolated polynucleotide consists of the isolated polynucleotide of claim 35.
- 54. (Previously presented) A bacterium of the species Escherichia coli comprising a vector which includes an isolated polynucleotide, wherein said isolated polynucleotide consists of the isolated polynucleotide of claim 35.
- 55. (New) A method for producing a protein which comprises cultivating a recombinant host cell of the genus Corynebacterium or of the species Escherichia coli containing a nucleic acid sequence selected from the group consisting of
 - (a) an isolated polynucleotide comprising the nucleotide sequence of SEQ ID NO: 1 or its complement;
 - (b) an isolated polynucleotide sequence, or its complement, which encodes the amino acid sequence of SEQ ID NO: 2;

- (c) an isolated polynucleotide comprising nucleotides 259 to 2130 of SEQ ID NO: 1 or its complement;
- (d) an isolated polynucleotide consisting of at least 30 consecutive nucleotides of SEQ ID NO: 1 or its complement;
- (e) an isolated polynucleotide consisting of at least 40 consecutive nucleotides of SEQ ID NO: 1 or its complement;
- (d) an isolated polynucleotide consisting of SEQ ID NO: 1 or a fragment of SEQ ID NO: 1 that encodes a polypeptide having the enzymatic activity of a DNA/RNA helicase; and

inducing expression of the nucleic acid sequence.

56. (New) The method of claim 55, wherein the host cell is of the species Corynebacterium glutamicum.
